

Maestro App

While Maestro is a cloud-based software, mobile editing isn't always the most convenient. That's why we've created the Maestro App, available for [Apple](#) and [Android](#) devices for free.

With the app, you will be able to update

your system on the go even easier. Functionality that is included in the app is:

- Ability to add/edit Contact, Business, and Property Profiles
- Including adding Involvements and making connections to other profiles
- You can also attach files, including using your camera to take pictures of people, businesses, and properties
- Ability to add/edit work plans
- Including creating new tasks, assigning tasks and attaching people to the work plan
- You can also mark tasks as complete
- Ability to add/edit Events

Functionality that is NOT included in the Maestro App and only available on the desktop version:

- Reporting / Advanced Search
- Inputting Investment Tracking
- Volunteer Opportunities
- Donations
